

ASSEMBLY INSTRUCTIONS

5 DRAWERS NARROW DRESSER

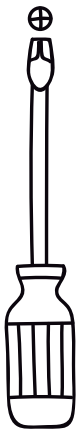

It's much better if you get some company for this!

What will you need?

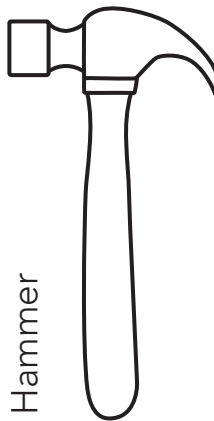

Phillips head screwdriver

Flat head screwdriver

Hammer

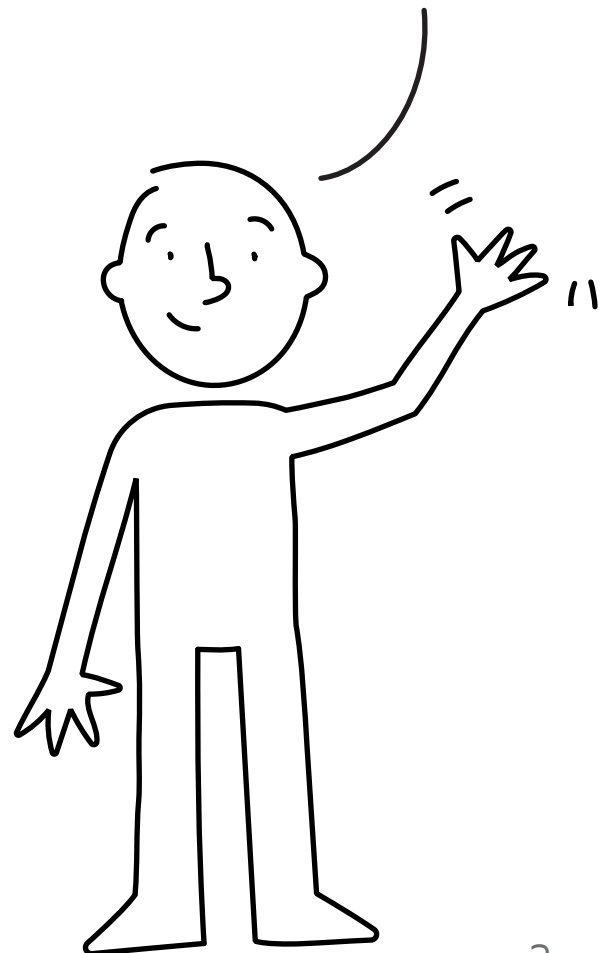

A flat, smooth surface. You can use the cardboard of the box or a rug.

An electric screwdriver isn't necessary, but it can make the work much easier :)

Hi! my name is Armando, and I'll be with you while you assemble this cabinet.

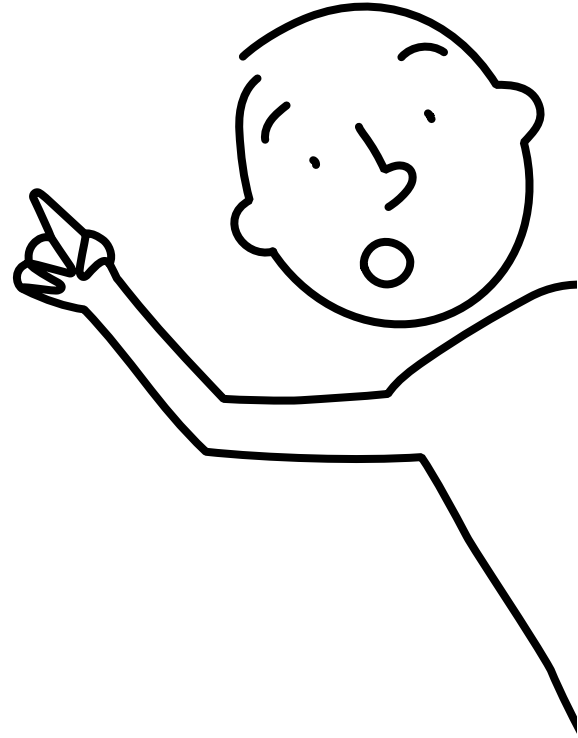

Where should you start?

This is so IMPORTANT!

Over the next few pages is the panel and hardware content for this cabinet.

Please make sure that the quantity of each one is correct, and that everything is in good shape.

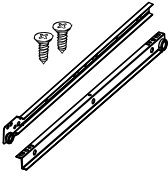

(When the cabinet is already assembled there's no warranty for this)

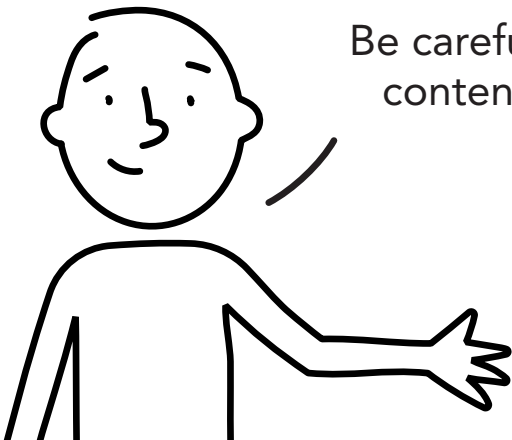

Panel quantity

A - x1	B - x1	C - x1	D - x1
E - x2	F - x5	G - x5	H - x5
I - x2	J - x1	K - x5	L - x5
M - x2			

What's in the hardware bag?

			
Wood dowel x32	Spreading bolt x32	Minifix cam x32	Cover caps x32
			
Nail-on glide x8	Drywall Slides + screws x5	Nail x24	2" Drywall Screw x20

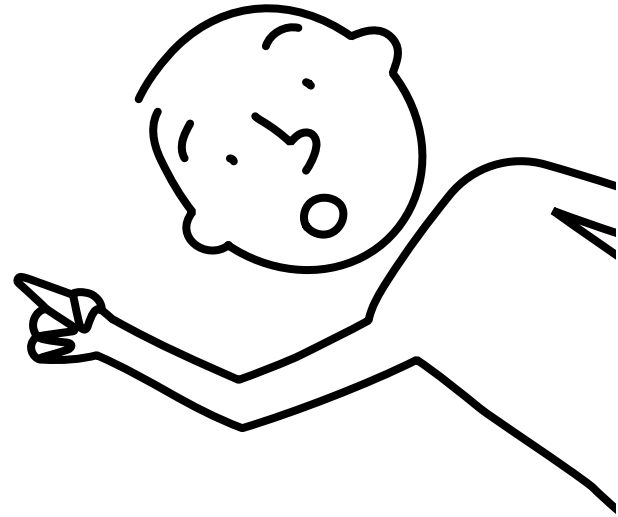

Be careful!, try not to lose anything from this bag, its content is necessary for assembling your cabinet.

How do the dowels and Minifix system work?

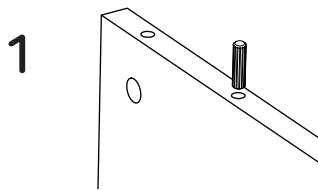

this is so important too!

Everytime you're using one of these connectors during the assembly, you should follow these same steps.

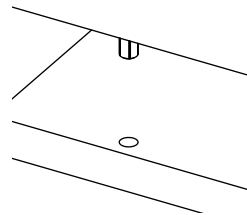

Wood dowels

They are little wooden cylinders.

Put in the dowel inside the indicated hole and softly hit it until it's fully inside.

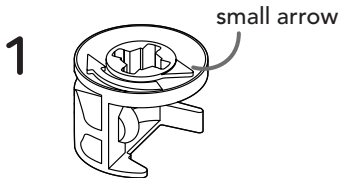

2

When joining two panels together, don't forget to gently hit the panels to adjust the joint.

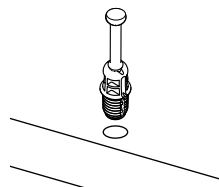

Minifix system

It's a joint compound of two parts: a spreading bolt and a Minifix cam.

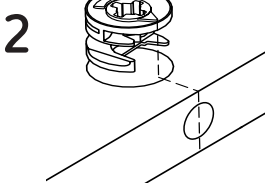

This is a Minifix cam. It has a little arrow on its upper surface.

3

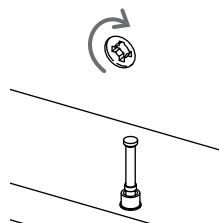

This is a spreading bolt. You should put it with the black plastic part facing down.

You should insert these cams with the little arrow pointing towards the drilling on the panel's edge (shown on the left).

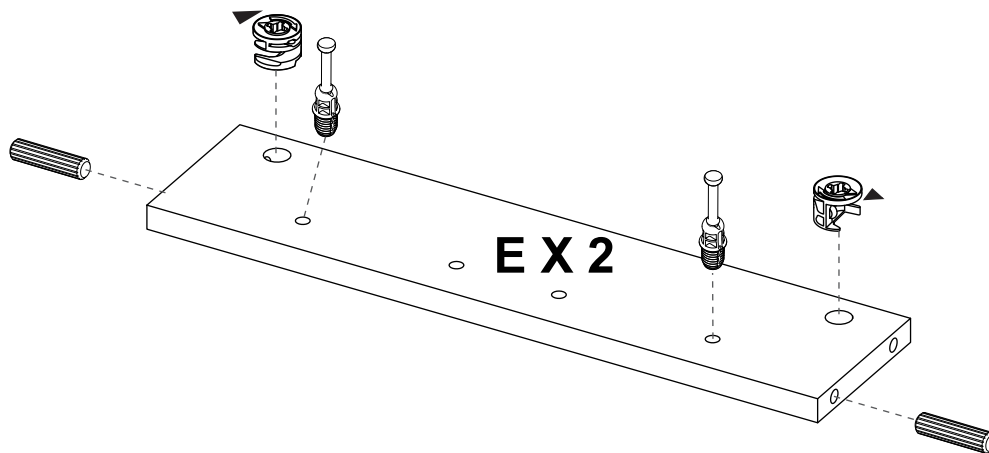

4

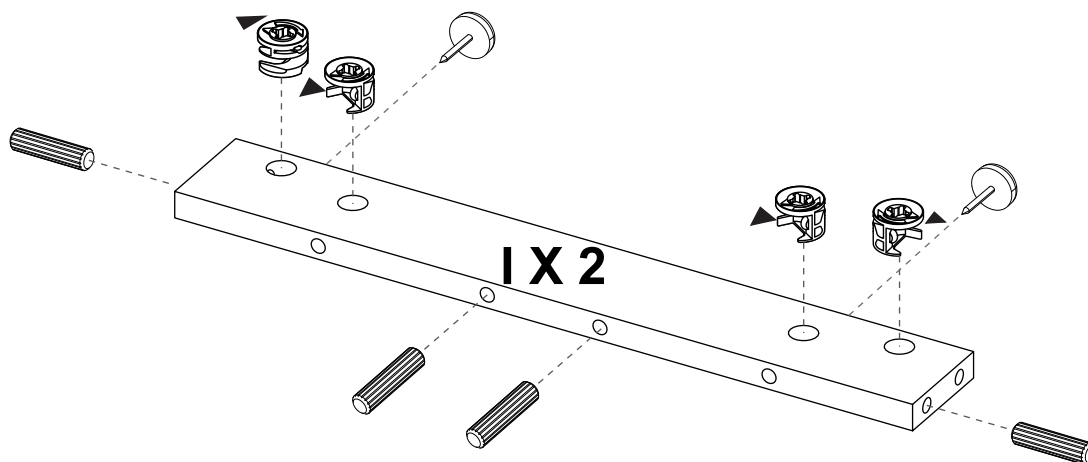

After joining two panels together you should turn the cams 180° with a phillips head screwdriver to adjust and secure the joint.

1 Let's start assembling!

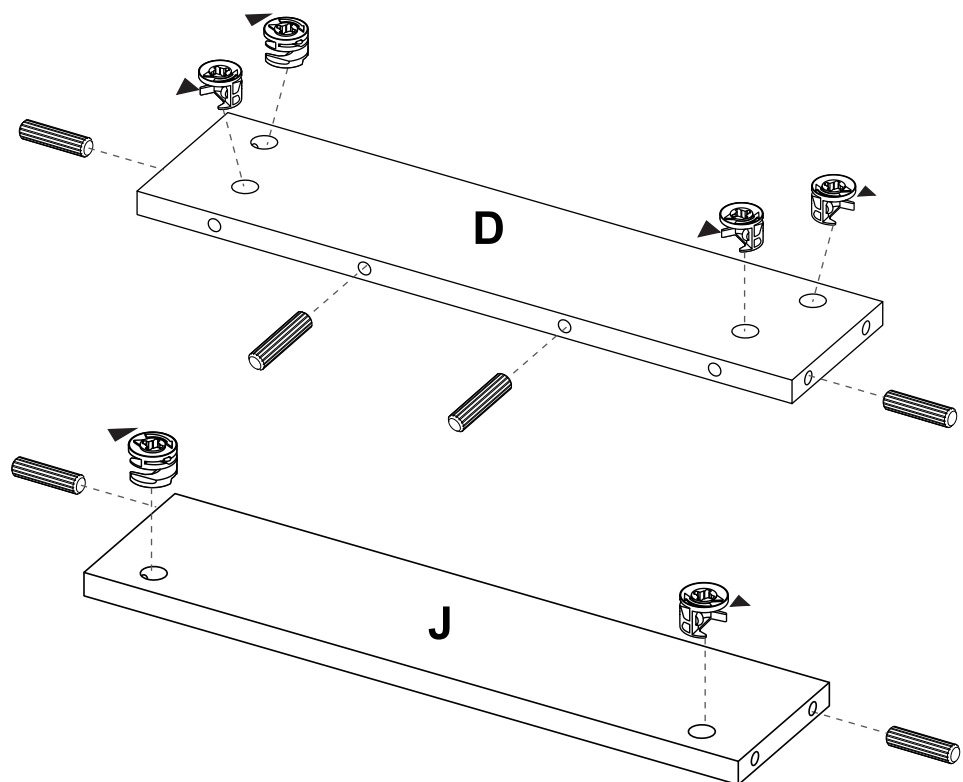

You can see the last page of this manual to have a full look of the panels of this cabinet.

Slide the drawer
inside the cabinet.

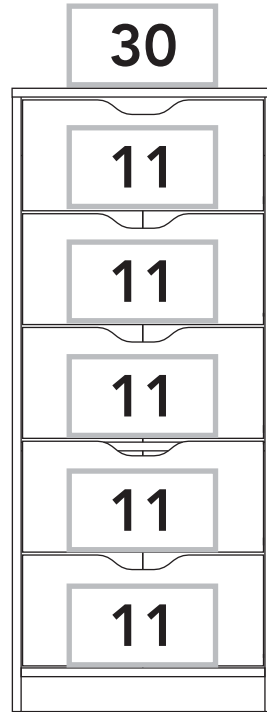

After adjusting all the
Minifix cams, cover
them up with the cover
caps.

A

After finishing the
assembly, lift off all the
adhesive letters.

How much weight does my cabinet resist?

*weight in pounds

Congratulations!
It's done

But don't go yet!

There are some
recommendations left for you
to take care of your cabinet
correctly from now on.

SUPER IMPORTANT!

We suggest fixing the cabinet to the
wall, so we can avoid the cabinet
tipping and harming anyone.
Be specially careful with the kids.

Taking care of your cabinet:

- Do not paint the cabinet.
- The cabinet is exclusively for indoor spaces. Do not expose it to the direct sun.
- Clean the metallic hardware with a dry cloth.
- DO NOT overload the cabinet (see suggested loads)
- Do not hit or hammer the cabinet (only when indicated here).
- Clean it with thinner, a soft soap solution or simply a damp cloth.
- Don't drag the cabinet, lift it up with other people.
- Avoid direct contact with water, fire or exposing it to high heat.
